

EQUI-STILL

Equine Dental Instrumentation....
Making dentistry fun again!

2023 CATALOGUE

1

Welcome to the Equi-Still Stocks and Dental Instrumentation Catalogue!

At Equi-Still, *we sell safety*. Whether it's stocks or high quality equine dental instruments, we've got your back!

Stocks:

For dentistry, reproduction, radiology, or standing surgery, our ***portable or stationary stocks***' three-pole, hot-dipped galvanized steel and aluminium construction, pressure-independent quick-release latching mechanism, plus removable/washable padding in crucial areas keep horses, vets, and handlers safe. Designed for safety, robustness and ease of use with many options.

Instruments:

To complement NZVA's Equine Dentistry courses, we are importing a wide range of instrumentation, with ***exquisite quality instruments*** for precision examination, floating, extraction, diastema therapy and more, for your world class dentistry! From ***HDE, Pegasos, MAI***, and others!

We also offer a line of budget essential instruments which will allow you to provide basic diagnostic and therapeutic dental care while proving the viability of dental practice expansion... before investing in more pricey advanced dental instrumentation solutions. For more details, see page 27.

Let us help you today!

SPECULUMS

MAI SPECULUMS

X Spec™

Next generation equine speculum, an enhancement of the original AlumiSpec™, known and trusted throughout the industry.

- Aircraft grade aluminum with a durable powder coat finish
- Wider design to accommodate digital radiographic plates
- Recommended for use with sedated animals
- Tested on hundreds of patients in an equine dental practice
- Net weight of 2.5 kg
- Replaceable synthetic straps
- Patented design

AlumiSpec™

- Replaceable straps in “cinch-lock” locking system allows infinite degrees of access to the oral cavity
- Easy to clean and is pliable at all temperatures
- Lightweight aluminum, net weight of 2.8 kg
- Durability not compromised by lightweight design

MAI SPECULUM REPLACEMENT PARTS

53602 Replacement Opening Latch Strap for AlumiSpec™ & X Spec™

53603 Cam Buckle for Opening Latch Strap for AlumiSpec™ & X

53608 Replacement X Spec™ Bite Plate Pads with Holes (Set of 2)

53676 Replacement Poll Strap for AlumiSpec™ & X Spec™

53675 Bolt Kit for AlumiSpec™ & X Spec™ –for One Side

53425–1 Magnetic Speculum Plate (for use if you use a magnetic spec light, as magnets won't stick to aluminium.)

HDE Speculums

2000series Millenium Speculum with mouth plates and Biothane straps

COMMERCIAL GUARANTEE

#1 New Zealand manufacturer of equine portable and stationary stocks

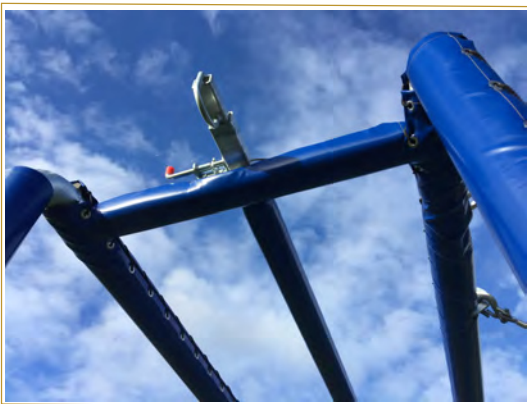

PORTABLE STOCKS

- designed for safety, robustness and ease of use by a U.C. Davis-trained equine veterinarian and ICU Technician
- heavy, hot-dipped galvanized steel
- best quality closed cell foam padding with heavy duty woven polyester coated on both sides with flexible PVC
- absence of a fourth post
- quick-release rear latch
- winch, water tank, and pump, powered via a jump-start battery pack, allowing you to use it with multiple practice vehicles without specialty wiring
- one **Equi-Table** is included, which may be mounted on one of three corners
- stocks tip up and down via winch, and may be raised and lowered even when not attached to vehicle
- patients may be restrained in forward or rearward configuration to assist in dental, reproductive, radiological, or surgical procedures
- best quality engineering: which means our stocks back and tow beautifully, barely tracking around bends
- our make and models are registered with the USA NHTSA (National Highway Traffic Safety Authority)
- stocks met voluntary NATM Compliance Certification in 2018, meaning they met or exceeded most USA states' requirements for registration

a lasting investment in your practice and your safety

MODEL TUI

- one side of stocks is formed from square steel bars, allowing better access to patient
- The other side is heavy plywood, which may be drilled to allow rope placement to fit your smaller patients
- a rope, or Optional Extra **Equi-Tie**, holds patient in place, whether horse is placed head-first or rear-first for reproduction work

PORTABLE STOCKS

MODEL KEA

- two sides of stocks are solid steel with holes for bars
- a rope, or Optional Extra *Equi-Tie*, may be used instead to hold patient in place, whether horse is placed into stocks head-first, or rear-first
- the holes in the steel sides allow use of bars to hold horse in place, should you desire them

STATIONARY STOCKS

- designed for safety, robustness and ease of use by a U.C. Davis-trained equine veterinarian and ICU Technician
- heavy, hot dipped galvanized steel
- best quality closed cell foam padding with heavy duty woven polyester coated on both sides with flexible PVC
- absence of a fourth post
- quick-release rear latch, which combined with only three posts, means stocks open up fully in emergency
- stationary stocks come with separate mounting pipes to inset into floor concrete where you wish the stocks to be placed, so the stocks may later be moved
- stocks include one **Equi-Table**
- stationary stocks have no floor, winch, pump, water tank, etc.
- a lasting investment in your practice and your safety

TUI STATIONARY

- as with our portable stocks, one side of stocks is formed from square steel bars, allowing better access to patient
- a rope, or Optional Extra **Equi-Tie** holds the patient in place, whether horse is placed head-first or rear-first for reproduction work
- best quality closed cell foam padding with heavy duty woven polyester coated with flexible PVC on both sides
- absence of a fourth post
- quick-release rear latch
- a lasting investment in your practice and your safety

KEA STATIONARY

- two sides of stocks are solid steel with holes for bars
- a rope, or Optional Extra **Equi-Tie**, may be used instead to hold patient in place, whether horse is placed into stocks head-first, or rear-first
- the holes in the steel sides allow use of bars to hold horse in place, should you desire them

OPTIONAL EXTRAS

THE MINI BAR

- mounted on the lowest side rail of the stocks to help contain your smaller patients, be they equine, camelid, bovine or anything else
- easy on, easy off

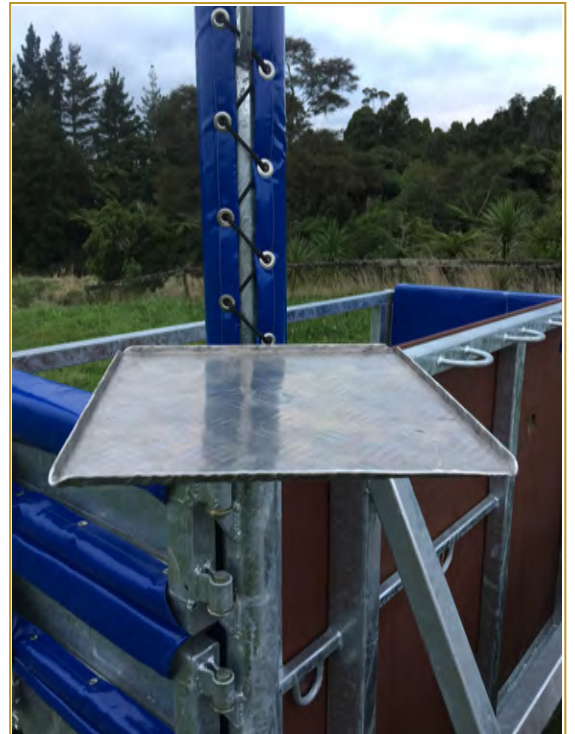

THE EQUI-TIE

- heavy, thick, soft nylon rope with brass snap
- keeps patients in place during procedures
- plywood backing of *Tui* model may be drilled at heights appropriate to your patients' sizes to run the soft rope through

THE EQUI-TABLE

- removable table, one provided with stocks
- additional tables may be purchased, to your specs
- mounts on any of three different corners of stocks
- designed to tip to read ultrasound or other screens

THE EQUI-COVER

- stocks cover for use while on the road or for storage
- same poly/PVC as stocks upholstery

OUR COMMERCIAL GUARANTEE

1. SCOPE

In addition to the Legal Guarantee, EQUI-STILL PORTABLE EQUINE STOCKS (EQUI-STILL) offers practitioners an EQUI-STILL Commercial Guarantee which applies to all new EQUI-STILL-branded portable and stationary stocks purchased by the practitioner from EQUI-STILL, from Aug 20, 2020.

2. DEFINITION

a) Product Commercial Guarantee

EQUI-STILL guarantees to the practitioner against breakage his/her EQUI-STILL-branded portable and stationary stocks for a 12-month period following its date of purchase from EQUI-STILL. This applies to:

- Broken parts (except "wear and tear" parts – paragraph 3.b)
- Labour costs
- Transport costs.

b) After-Sales Service Commercial Guarantee

All repairs made by EQUI-STILL on EQUI-STILL portable and stationary stocks are guaranteed for 6 months. This guarantee covers:

- Broken parts replaced in the last 6 months (except "wear and tear" parts – paragraph 3.b)
- Labour and transport costs for the replacement of these parts

c) Free annual check-up

After the initial 12-month period of guarantee, EQUI-STILL and our Official Technical Centers* offer one Free Annual Check-up to extend the life of your equipment. WOF requirements in New Zealand are the responsibility of the purchaser. The Check-up includes the following:

- Complete test of the stocks
- Cleaning
- Greasing

Labour costs are free of charge, transport costs are at the practitioner's expense.

This free check-up is valid once every calendar year.

Further to this check-up, in case repairs are required, spare parts, repair labour and transportation costs are at the practitioner's expense. In this case, an estimate will be sent for approval before any repair is done.

3. IMPLEMENTATION

a) Product registration

The product commercial guarantee, the after-sales service commercial guarantee and the annual check-up will only be implemented if EQUI-STILL products are registered on EQUI-STILL's website within 15 days following the purchase by the practitioner from EQUI-STILL or one of its official distributors.

b) Disclaimer

The commercial guarantee applies to all EQUI-STILL Portable Equine Stocks except:

A – The following parts:

- tyres, (other than manufacturer's warranty on defects).
- jump-start battery (other than manufacturer's warranty) .
- electrical system or electrical components, if any alteration to the electrical power system or power items have been performed other than by an Official EQUI-STILL Service Center. This includes, but is not limited to, power input source, water pump, winch, lights, or any wiring.

B – If the problem is caused by an accident

C – If the damage is caused by the user, including driving at speed over irregular roads or speed bumps.

D – If the user fails to comply with the instruction manual and/or EQUI-STILL cleaning and service recommendations

E – If the VIN number of the product is removed or modified

F – If the product is modified by anyone other than an Official EQUI-STILL Service Center or if it is modified with non-EQUI-STILL parts.

G – If the product was not registered by the practitioner on EQUI-STILL's website within 15 days after its purchase.

Making dentistry fun again!

DENTAL HALTER

DENTAL HEAD SUPPORT

INTRAORAL CAMERA

HEADLIGHT SET

HAND INSTRUMENTS

**LONG WOLF TOOTH ELEVATORS
DENTAL MIRRORS**

K-FILES

EQUI-STILL: New Zealand's #1 manufacturer of equine portable and stationary stocks

DIAGNOSTIC KIT

A carefully selected set of seven instruments plus extras to enhance and improve your equine dental examination... all in a handy zippered folding case.

KIT CONTAINS

- **Round Mirror on T-Handle**
 - smaller mirror may be easier to handle in the mouth
- **Mirror Spares**
 - to replace mirror in case of breakage
- **Alligator Forceps**
 - 40 mm long, with 2-3 cm tips at 90°.
- **Double Ended Scaler**
 - perfect for scaling tartar from incisors and canines, plus evacuating rostral diastemata
- **Periodontal Probe with Black Increment Markings**
 - for determining and documenting depth of periodontal pockets
- **Large Curette Scaler**
 - sturdy instrument for scaling teeth, evacuating diastemata, and as a general pick
- **Dental Pick**
 - sturdy instrument for evacuating diastemata and as a general pick—no separate pieces to lose
- **Explorer Fine Tipped**
 - Fine tipped probe for investigating for pulp exposures and other pathologies—remember, this one is more fragile than the pick and the scaler, above
- **Leather-Look Synthetic Zippered Case**
 - professional looking, with easy clean exterior

DENTAL HALTER

Finally, a safe and convenient support for dental and other treatments of the equine head!

- Made from heavy duty Biothane, which remains soft and pliable, no matter how cold the temperature, no matter how many washes and disinfections you give it!
- Heavy duty snaps, rings, and buckles are made from high quality stainless steel
- All parts are replaceable, for future-proofing your dental halter
- Chicago Screws (rather than rivets) throughout allow easy removal or replacement of straps
- Designed for stable support of head--no tipping from side to side if horse moves head off centre--on the head rest, so no need to continually re-position halter and patient
- Snap hook on chin strap for quick on and off fitting, no need to unbuckle the crownpiece
- Soft cushion on head rest is coated in rubber for easy cleaning. This head rest may easily be replaced as it wears over time, whereas the halter itself has a long life span. You will get a discount on the new replacement head rest when you return your old one!

EQUI-SUPPORT

Our own standard head support lets you raise or lower your patient's head with a simple one-handed cleat.

- The Equi-Support system includes 4 metres of soft, heavy nylon braided rope and a quick-release cleat for safety
- Easy, one-handed action lets you release the support as quickly or slowly as you wish
- Dental halter not included

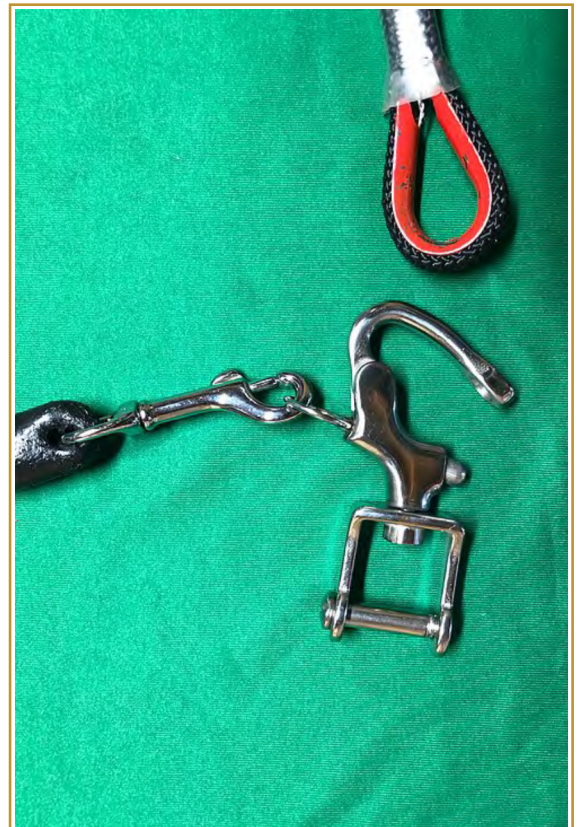

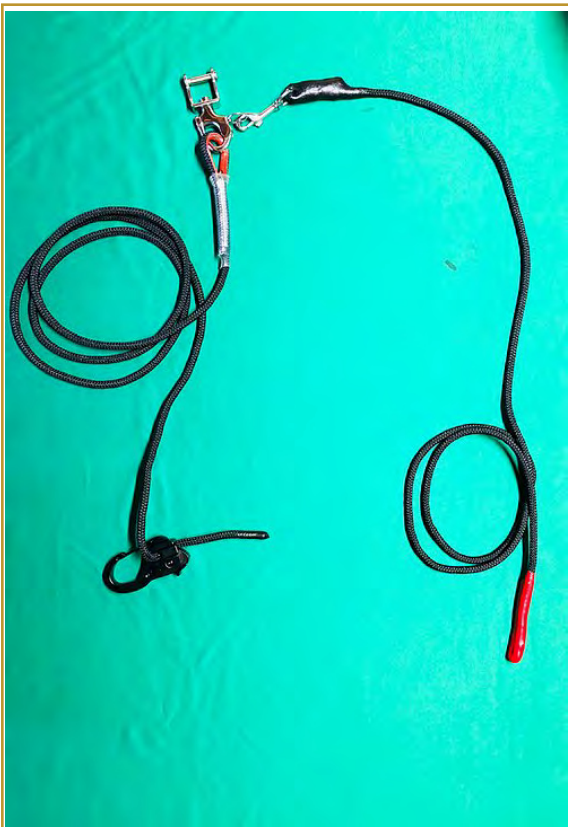

DENTAL HEAD SUPPORT

Our dental head support suspension system allows for a simple, smooth way of raising or lowering the horse's head to the exact height needed.

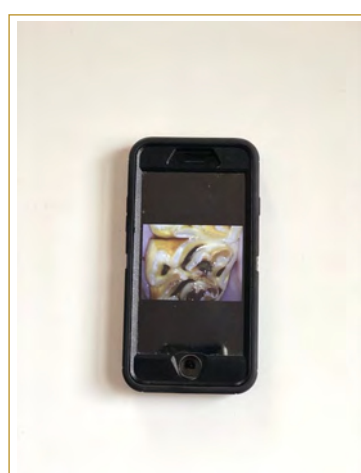

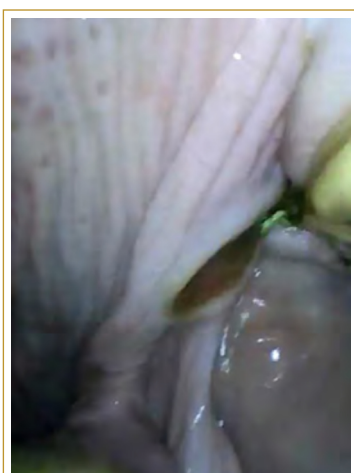

- The support system includes strong stainless steel snaps and quick release latch for safety
- The quick release rope should be positioned to the side of the working space (e.g. stocks, doorway), allowing the practitioner to step away from the horse while being able to instantly release the head support when needed

INTRAORAL CAMERA-SCOPE

This brilliant little number lets you photograph and video... on your smartphone!

- Its articulating head bends more than 90 degrees, enabling you to inspect deep in the alveolus
- Stainless steel shaft, with an easy-clean, comfortable handle.
- Self-contained WiFi system lets you connect multiple nearby analogue or iOS phones or iPads for viewing by you and clients—capture images or videos using your device's photo capability
- Excellent detail and colour of image
- Six variable brightness LEDs let you see!

NSE USB VIDEOSCOPE

MODEL UE-100 HAS BEEN DESIGNED SPECIFICALLY FOR EQUINE DENTISTRY IN CONSULTATION WITH A TOP EQUINE DENTAL VET.!

➤Just plug in and play for real-time observation and recording of your oral (or other) endoscopic exam

➤Multi functions: Photo, Video, Freeze. Zoom in, zoom out.,

➤Review image 180° reversible.

➤Wand with camera is 360° rotatable

1/9" COMS Sensor,	1280*720
Video Output	1280x720, 30P
Working Length	42cm
Angle of View	70 degree
USB Cable	2.8meter length, USB 2.0
Diameter	8mm (working pole)
Operation Software	MedCam

NSE EXPERT HEADLAMP

This NEW headlamp offers a simple, lightweight, comfortable solution for those who appreciate an extremely bright spot-type light with dual rechargeable lithium batteries for the practicing equine dental vet!
EL-P45

- Locking head band adjustment
- Two Li-ion polymer batteries of 2000 mAH power capacity battery 3.7 V, weight ONLY 150 g. (Incl battery)
- Easy on-off five-level dimming buttons and battery power indicator lights. Spare battery.
- Maximum illumination 40,000 Lux at 200mm. Light spot diameter 88 mm at 450mm

NSE SURGICAL HEADLAMP

This NEW headlamp offers a simple, lightweight, comfortable solution for those who appreciate an extremely bright spot-type light with dual rechargeable lithium batteries for the practicing equine dental vet!
EL-S50100

- Locking head band adjustment
- Two Li-ion polymer batteries of 2000 mAH power capacity battery 3.7 V, weight ONLY 150 g. (Incl battery)
- Easy on-off five-level dimming buttons and battery power indicator lights. Spare battery.
- Maximum illumination 50,000 Lux at 200mm. Light spot diameter 100 mm at 500mm

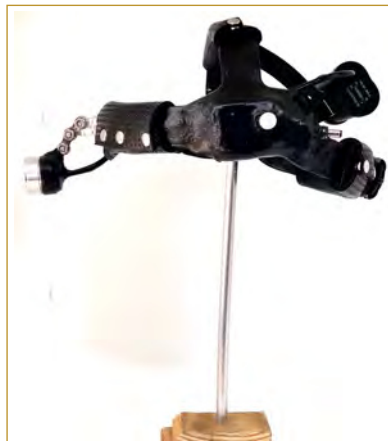

HEADLIGHT SET

This headlamp has many features designed to address issues often found with headlamp in a high-comfort setup for the practicing equine vet.

- Locking ratchet head band adjustment system.
- PATENT PENDING battery holder evenly distribute weight of the battery, balancing the light and preventing slipping of the head lamp when the practitioner tilts their head or sweats.
- 3400 mAH power capacity battery (average batteries 2600mAH) with power level indicator and rotary dimmer for your own preferred light intensity
- Heavy-duty on-off toggle switch
- Long light housing armature leaves adequate room for safety glasses and to helps minimise lens fogging

- 3 pivot-point screws let you adjust light beam exactly where you want it, without repeated adjustments
- Lens reflects light evenly both across the beam width, and from the front and the back of the mouth as well
- Up to 1000 lumens clear WHITE light with no tinting, offering accurate tissue coloration
- ✓ Back up light (for that day you leave your battery charger at home)
- Dipped rubber coating makes your head lamp water and dust resistant

This headlamp is designed to offer you everything you need in a daily-use light!

HAND INSTRUMENTS

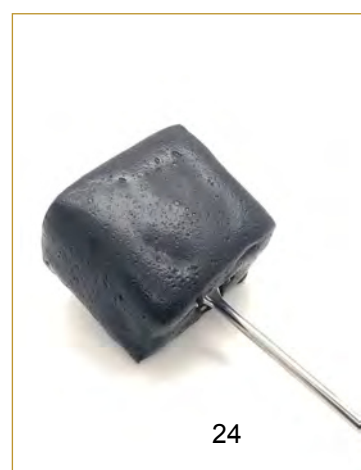

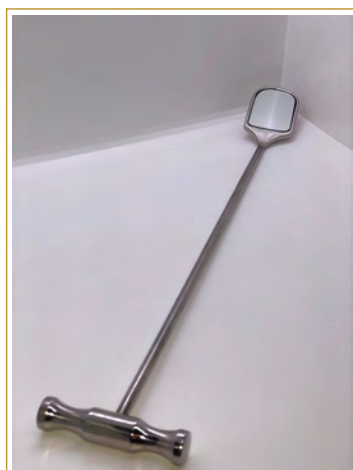

LONG SHAFTED ELEVATORS

- Solid stainless steel, not hollow
- Nice for wolf tooth extraction

DENTAL MIRRORS

- Long handled stainless steel mirrors
- Traditional round and rectangular
- Each mirror comes with a thick protective sponge cover

GENERAL EQUIPMENT

EQUODENT – DENTAL TROLLEY

Our treatment trolley was developed to place the expanding equipment for routine equine dentistry in a safe and tidy way. It creates a workplace which is easy and fast to set up, take down and accommodate in the practice car.

Its versatile cube shape and mixture of materials (coated multiplex boards and

aluminum drawers) make the trolley light and robust at the same time. Its surfaces are durable and easy to clean. It fits through every door with standard widths. It is easy to manage and fits into most compact vans.

Art.-No. #	Description
PEGA_313000	Treatment Trolley
PEGA_210122	Equodent Dental Burr Model Richard Miller – Watercooling, HDE connection
PEGA_221001	Equodent Dental Burr – Watercooling, key drive

PEGA_220023	Carbide burr (3,175 mm / 77 mm)
PEGA_220000	Storage block for burr bits (3,175 mm), autoclavable (metal, black)

EQUODENT DENTAL BURR MODEL RICHARD MILLER WITH WATERCOOLING

This bullet nose head dental burr is especially useful for horses with smaller heads and for the last cheek teeth (11) where most conventional equipment quickly faces anatomical limitations.

EQUODENT DENTAL BURR WITH WATERCOOLING

This burr with IC 300–Nakanishi head was developed for following applications:

- diastema work
- cheek tooth segmentation
- tooth crown remodeling to improve the grip of the extraction forceps
- pre-drilling during Minimally Invasive Transbuccal Extraction

The shaft bearing is greased which makes it "water-proof" and running quiet, without vibrations.

It has an external water supply enabling watercooling during drilling. This is necessary because the temperatures of the diamond burr can become very high and can damage the tooth. It is also available for both HDE shaft and dremel Key Drive.

This diamond coated diastema burr with a diameter of 3,175 mm / 0.12 inches was developed for diastemas work. It fits the IC-300 Nakanishi head.

CARBIDE BURRS

For segmentation we offer carbide burrs in 4 different length.

For a clear storage, one can use our autoclavable storage block.

DENTAL PROBES

This dental probe was developed for exploring teeth and cleaning interdental spaces. It is available in a long and robust version (18,5 mm / 0.71 inches) and in a short and fine version (15 mm / 0.59 inches).

DENTAL HALTER

The separation of dental halter and mouth gag reduces pressure on the incisors during treatment. Switching between working with and without mouth gag becomes easy. Furthermore it provides a safe handling of challenging horses during injection. The dental halter is covered with leather and has a soft and durable padding.

DENTAL X-RAY BLOCK

This block is a simple tool to open the mouth in 3 different angles for mouth radiographs. It is well tolerated in slightly sedated horses.

Art.-No. #	Description

EQUUS JET RANGE

Multi-purpose rinsing devices

The Equus Jet range has been developed as an autonomous, robust, compact cleaning and cooling system with the mobile equine dentistry practitioners and clinics in mind. It is ideal for cleaning the mouth before and after dental work, diastema, rinsing after tooth extraction, sinus flushing or cooling when working with handpieces.

EQUUS JET

- High pressure (up to 11 bars)
- 5 set levels of pressure regulated via the white control panel on top
- Lithium ion battery (up to one month autonomy)
- Possibility to use a wired foot pedal to gradually regulate flow and pressure
- Fast connecting and disconnecting hoses and wands
- Double filter system (external and internal)

Optional sinus Kit

Optional foot pedal

EQUUS JET ECO

- High pressure (up to 11 bars)
- Flow regulated via the wands
- Lead battery (up to a week autonomy)
- Fast connecting and disconnecting hoses and wands
- Double filter system (external and internal)

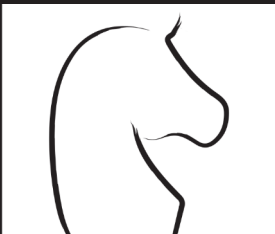

The Equus jet eco and the Equus jet include the following accessories:

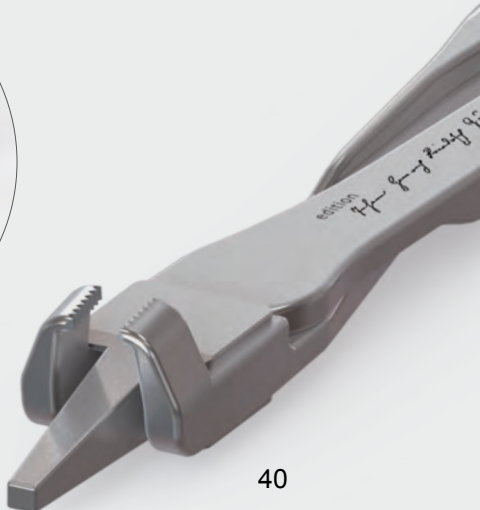

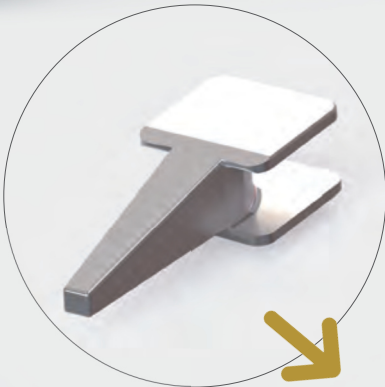

- One flushing wand
- One diastema wand
- An input polyurethane hose pipe with a strainer and filter
- An output spiral polyurethane hose pipe with fast connector on one side and fast connector with valve on the other, allowing to change the wands without shutting off the pump to save time
- A special lead or lithium ion battery charger

INSTRUMENTS FOR DENTAL EXTRACTIONS

HORSE DENTAL
EQUIPMENT

THE EXTRACTION SYSTEM FROM PEGASOS4D MODEL: HAUPTNER

Edition: Johann Heinrich Friedrich Günther

Comments on Model and Edition

Model Hauptner: The development and construction of these instruments was supported by the company Hauptner. Hauptner has more than 150 years experience on making instruments and produced in the past some of the best forceps available at that time.

Edition: Johann Heinrich Friedrich Günther

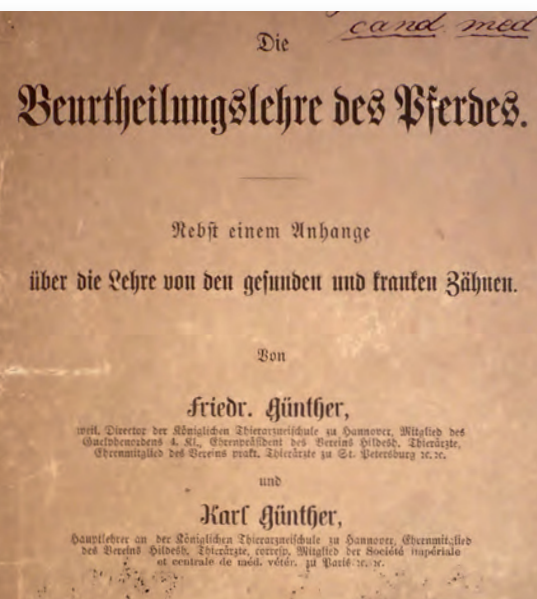

Who was J. H. Friedrich Günther and what influenced did he have to the method of oral extraction of teeth?

He was born in 1794 in Germany. He got educated in Jena, Berlin and Hanover. After he had finished "Royal Equine Vetschool" Hanover in 1818 he started to work as a veterinary surgeon. Only one year later he was called by the school to become a teacher. Apart from his work at the vetschool he ran a private clinic where he taught the older students the practical part. Additionally he was an inspector at the Marstall and gave lessons at the military academy. Since 1840 he did research as well.

In 1847 he became the director of the Hanovarian vetschool. He strongly increased the level of education of veterinary surgeons during that time.

Alongside teaching he did a tremendous high quality work concerning the development and construction of surgical instruments. Furthermore, he gathered a comprehensive collection of diseased teeth. He is, indeed, considered as a founder of the equine dental surgery. Together with his son he wrote a booklet about horses' teeth which was published in 1859, one year after he had died.

Even 50 years after his death his extraction forceps were widely used and highly valued. He was doing oral extraction of equine teeth at a high level. Unfortunately this knowledge got lost over the following century. His early work is only little known and it is a mission to make it accessible again to veterinarians. His early literature of 1859 is highly recommended because it is still up to date in many respects. In order to support the rediscovery of his work we named this forceps and spreader line after him: Edition "Günther".

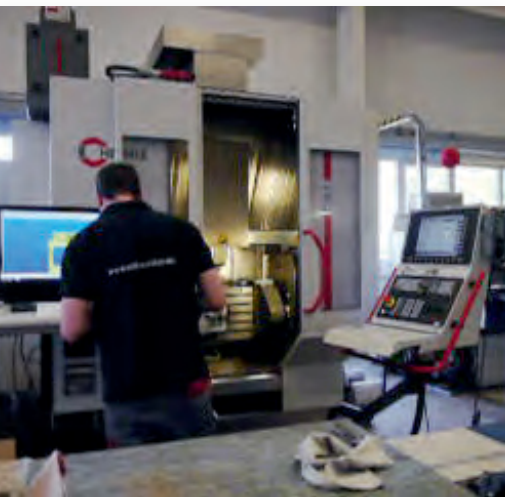

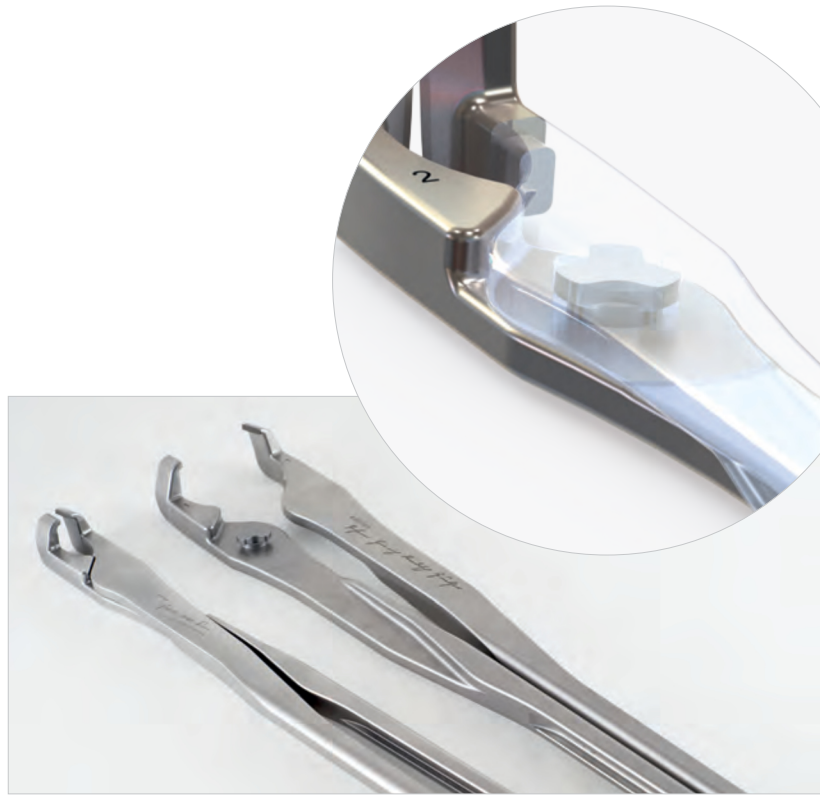

The Spreader and Forceps System was developed to improve oral extraction techniques in equine dentistry.

Great efforts have been invested to design the instruments as ergonomic and efficient as possible. The different sizes of spreader blades enable a standardized stepwise working process. Thereby, the duration and success rate of the extractions are influenced very positively.

The extreme precision of the joint creates the possibility to disassemble and reassemble the single halves of the instruments.

It enables a variety of combinations that has not been available yet, like the combination of spreader and forceps within one instrument. It is most helpful in cases of slab fractures and very tight interdental spaces especially in the lower jaw. It also enables a thorough cleaning of all parts.

Manufacturing

- Instruments are made of heat-treated surgical stainless steel.
- The body is milled out of one piece on a 5-axis-CNC-milling centre.
- The spreader inserts are laser-welded and labeling is done with a laser marking system.
- The construction was tested with FEM-analysis and does still have, at a 80 kg handle pressure, a safety factor of 3.
- Made in Germany*.
- 5-year warranty.

General notes on maintenance

The possibility to disassemble the instruments enables easy and thorough cleaning. This should be done after each use. From time to time the fulcrum pin should be treated with surgical instrument silicone spray.

All instruments are fully autoclavable and chemically disinfectable.

MOLAR SPREADERS

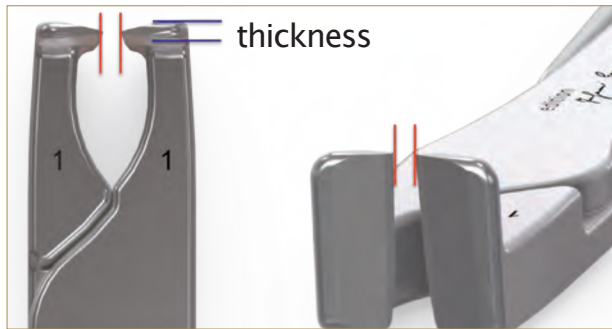

Molar spreaders are used to loosen the periodontal ligament and hence the tooth, through applying it to the interdental space.

There are three different spreader sizes. They allow a standardized stepwise working process. This enables a very careful and crown-saving work. It significantly improves the success rate of oral extractions.

Art.-No. #	Description
PEGA_320001	Molar Spreaders No. 1 - thickness 4 mm
PEGA_320002	Molar Spreaders No. 2 - thickness 5 mm
PEGA_320003	Molar Spreaders No. 3 - thickness 6 mm

Differences between No. 1-3

Molar Spreader No.1, the thinnest one with a 4 mm (0.16 inches) thickness (blue), does additionally have a cleft (red) between the jaws. Therefore, the handles don't need to open that far. This enables a more ergonomic first spreading step. One can apply a much more controlled force. This is especially helpful in case of fragile teeth.

The varying jaw thickness enables different spreading effects.

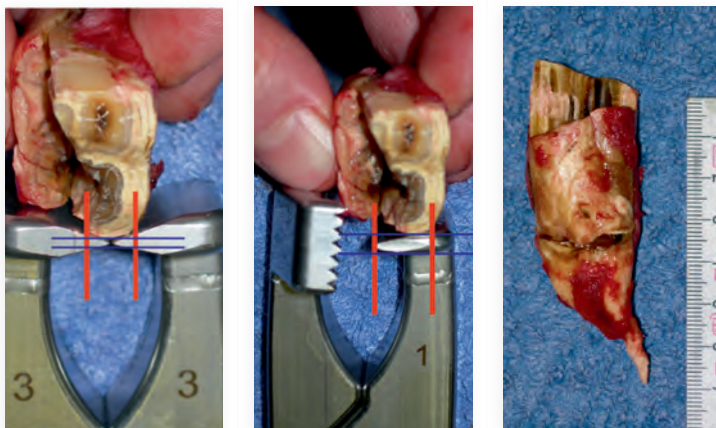

Spreader No. 1 - Narrow - the 4 mm (0.16 inches) thickness works much finer than No. 2 - Medium. No. 1 is mainly used as the first step spreader for the maxillary cheek teeth because they are wider than mandibular cheek teeth.

Spreader No. 2 - Medium - the 5 mm (0.19 inches) thickness works for the upper jaw as a second step and for mandibular cheek teeth as a first step.

Spreader No. 3 - Wide - the 6 mm (0.24 inches) thickness is used only partially (1/3-2/3) for the maxillary cheek teeth and up to full effect for mandibular cheek teeth.

It is recommended to use the forceps to loosen the tooth with rotational movements between the spreading steps, otherwise the risk of breaking the tooth/roots will increase.

Interchangeability

Additionally, the application of spreaders in combination with forceps is possible thanks to its interchangeability. This is especially helpful in cases where the interdental space is not wide enough to use conventional spreaders. This is the case in slab fractures and for the lower jaw.

Cavity: one has to be careful on side of the forceps part otherwise breakage of the tooth can occur.

EXTRACTION FORCEPS

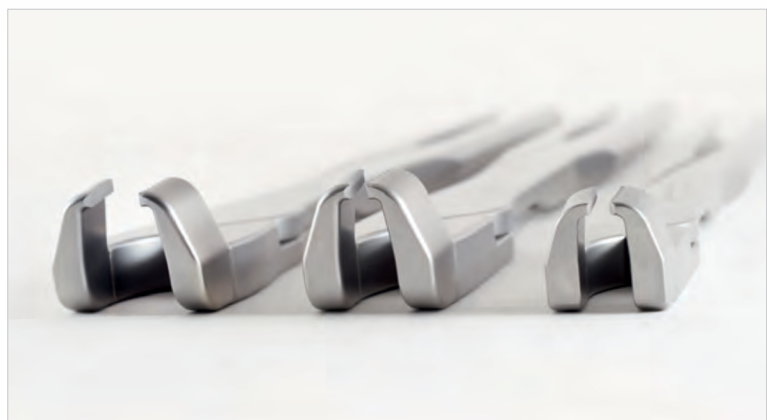

Extraction forceps are used to further loosen teeth with rotational and tilting movements and finally to extract the teeth in combination with a fulcrum.

The **Extraction Forceps No. 1** is particularly helpful for mandibular cheek teeth extractions but can also be used for the upper jaw.

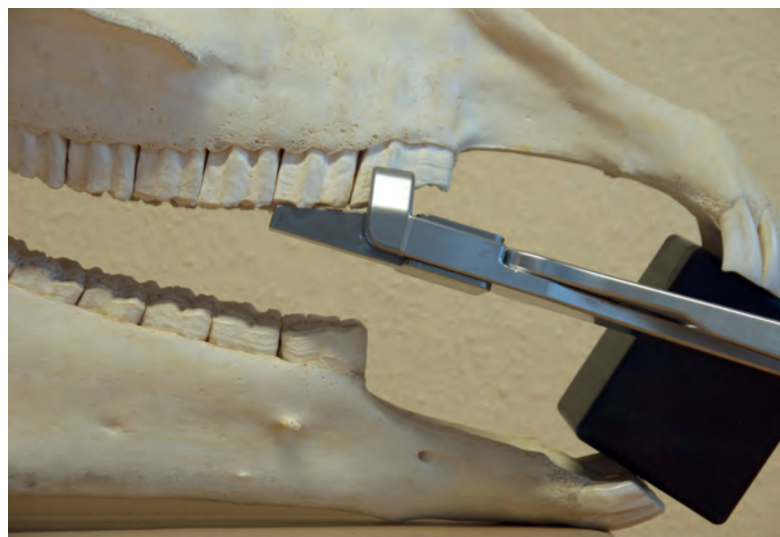

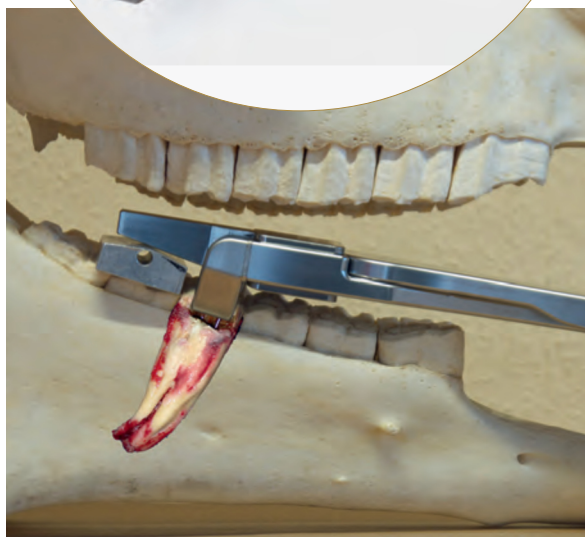

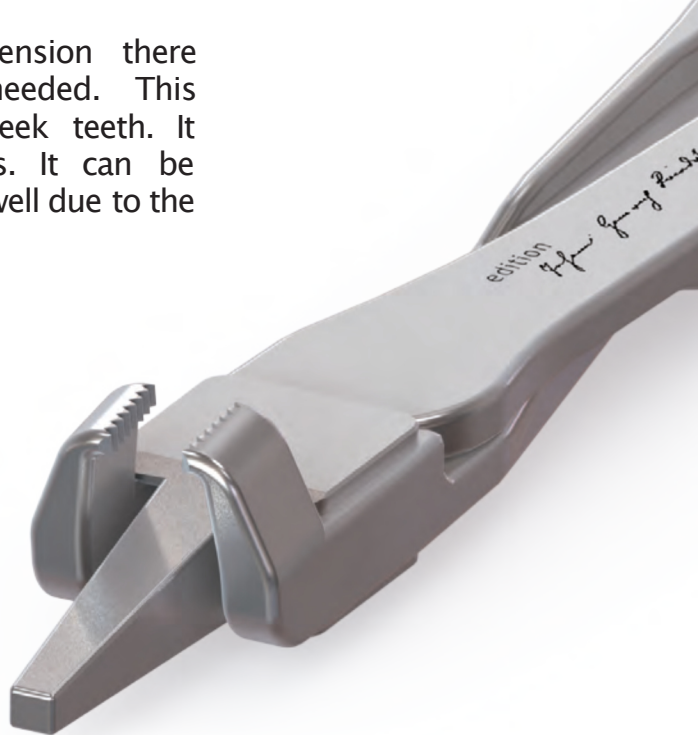

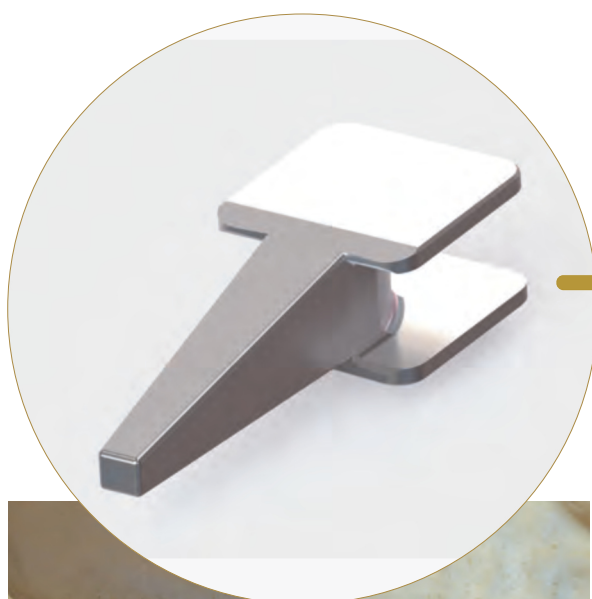

The **Extraction Forceps No. 2** is specifically designed for the wider maxillary cheek teeth. The Extraction Forceps can be disassembled and reassembled again in many different ways like the spreaders.

For horses with small heads we developed the "**Pony Model**". The actual version is dedicated to **Professor Padraic Dixon** from the University of Edinburgh who, at the end of the 20th century, made great efforts to re-introduce oral extraction techniques.

REVERSE FULCRUM

Thanks to this new Reverse Fulcrum Extension there is no extra Reverse Fulcrum Forceps needed. This system works both for lower and upper cheek teeth. It is especially recommended for 06 and 07's. It can be a quite helpful approach for lower 09 and 10 as well due to the curved nature of these teeth.

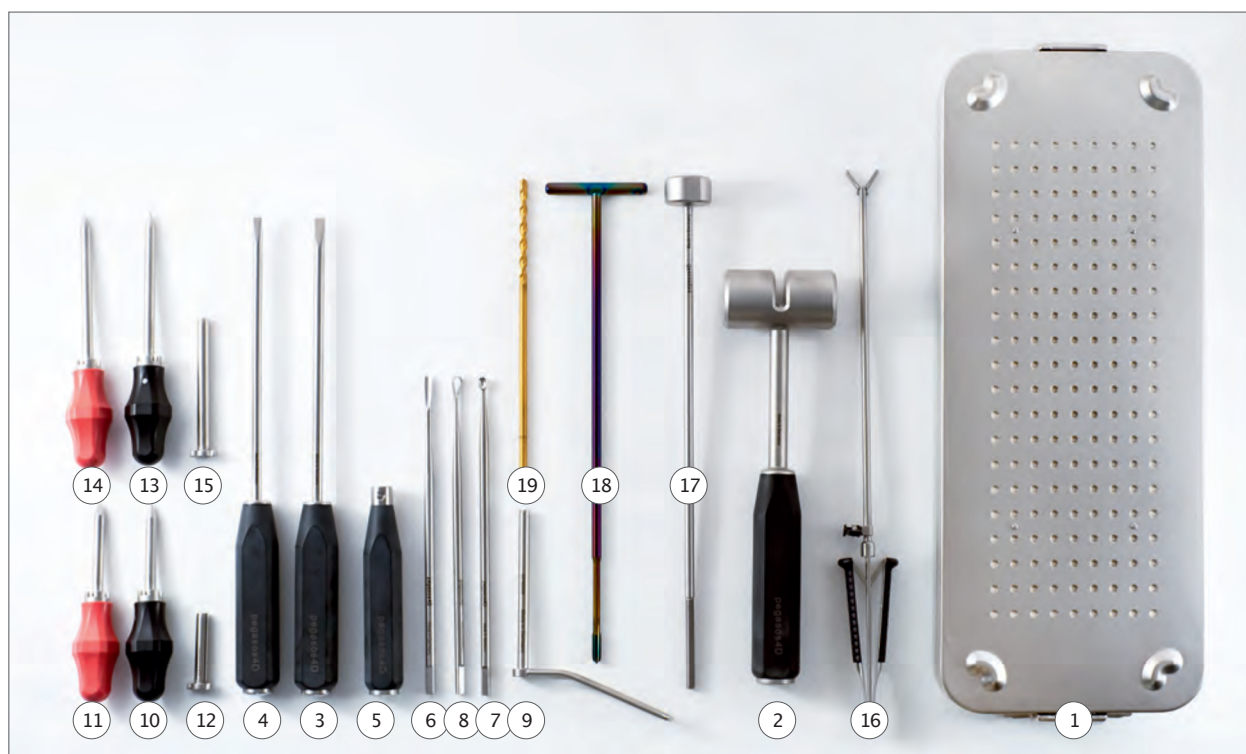

Art.-No. #	Description

PEGA_321002	Molar Forceps No. 2 - large
PEGA_321010	Reverse Fulcrum Extension (fits Molar Forceps No. 1 and No. 2)

KIT FOR MINIMALLY INVASIVE TRANSBUCCAL EXTRACTION (MTE)

The MTE technique is indicated in the following cases:

- Force applicable to the crown is insufficient
- Crown is broken off or too fragile
- Malformation of the crown
- Removal of root fragments

To use the MTE Kit, it is necessary to attend a workshop where this technique is taught in-depth.

Art.-No. #	No.	Description	Art.-No. #	No.	Description

DENTAL PICKS

DENTAL PICK SET – BASIC

This set contains a 8° handle, a set of 5 mm / 0.19 inches luxators in different lengths and a non-autoclavable screwdriver. It can be used to loosen gingiva, to remove tooth fragments or remaining roots. The luxators have a fine and sharp tip and can be applied in any turning direction.

The short and blunt insert is intended to fix the screw during transport.

Art.-No. #	Description
PEGA_310100	Dental Pick Set – Basic T-Handle – 8°, Wide Luxator Set, 5 mm (0.19 inches), Screwdriver
PEGA_310101	T-Handle – 0°
PEGA_310102	T-Handle – 8°
PEGA_310103	T-Handle – 18°
PEGA_310104	T-Handle – 30°
PEGA_310000	Wide Luxator Set – 5 mm (0.19 inches)
PEGA_310010	Narrow Luxator Set – 4 mm (0.16 inches)
PEGA_310020	Chisel Set
PEGA_310030	Probe Set
PEGA_310040	Sharp Spoon Set
PEGA_BLOCK	Storage block, autoclavable (hard tissue)
PEGA_310106	Storage block, autoclavable (metal)

DENTAL PICK SYSTEM: 4 DIFFERENT HANDLES

Dental picks are intended for intraoral use.
There are 4 different handles, corresponding to 4 different angles:

The 0° Handle can be helpful for the mandibular jaw.

The 8° Handle is the most often used one (up to 80% of the cases can be solved with it).
Inserts can be used in a backward direction as well (helpful for lower premolars).

The 18° and 30° Handles are used for the more caudal teeth.

INSERTS

Additionally, there are different types of inserts available. They can all be used with the short straight handle as well to have even more versatile applications.

Narrow Luxator Set – 4mm /0.16inches (5 lengths)
The narrow luxators are used for extra small fragments.

Chisel Set (4 lengths)
The chisels are used to get into the interdental space to loosen or remove tooth fragments.

Probe Set (5 lengths)
These probes are particularly useful for exploring deep fistulacanals and other dental and periodontal pockets.

Sharp Spoon Set (4 lengths)
These curettes are useful for cleaning the tooth socket and removing deep root fragments.

SHORT HANDLE EXTRACTION KIT

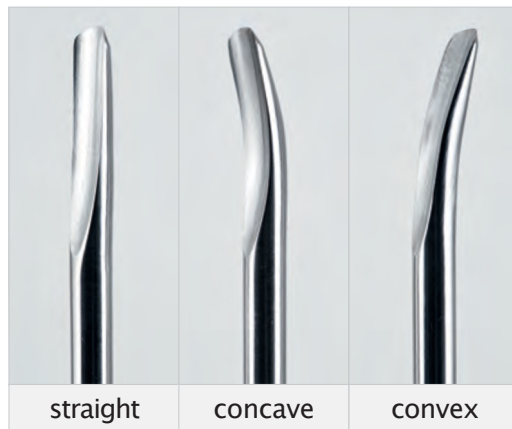

This kit consisting of a short handle with different luxators is very useful for the extraction of wolf teeth, incisors, canines and deeply located root fragments.

It contains straight, concave and convex curved luxators in a 4 and 5 mm / 0.16 and 0.19 inches version.

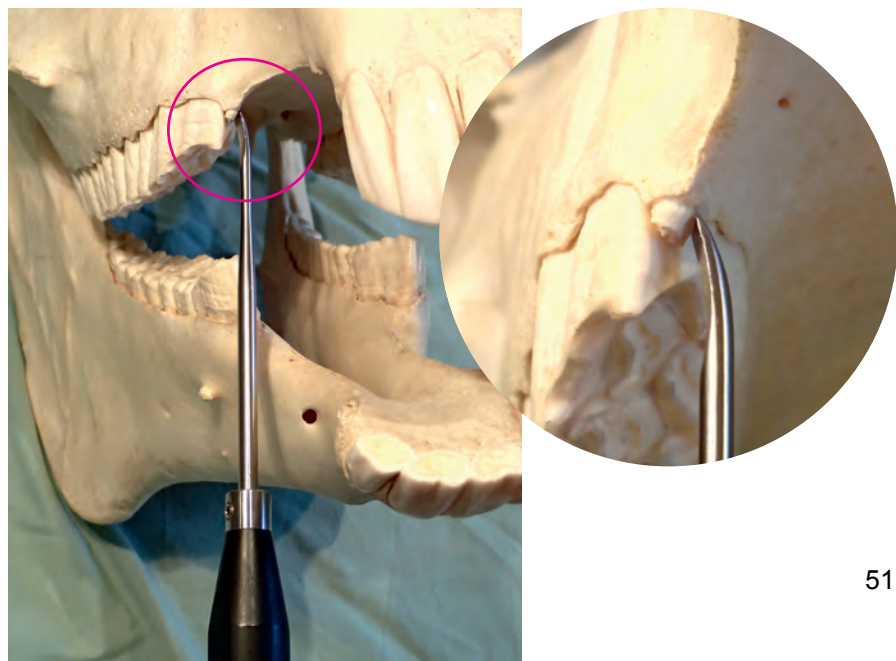

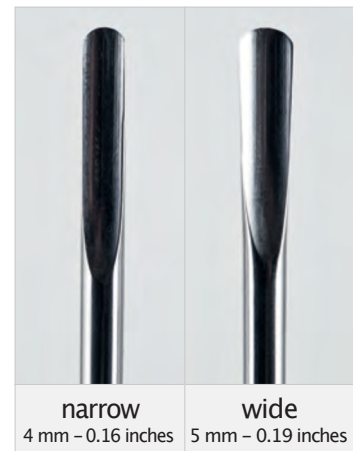

Particularly the concave curved tips allow a very good access to the palatal side of the wolf tooth and enable a careful extraction with minimal damage.

The short handle is designed to allow the gentle usage of a hammer as well. Furthermore, this short handle can be combined with all different inserts from the Dental Pick System.

Shapes

Widths

Art.-No. #	Description

HDE COMMERCIAL GUARANTEE

1. SCOPE

In addition to the Legal Guarantee, HORSE DENTAL EQUIPMENT (HDE) offers practitioners an HDE Commercial Guarantee which applies to all new HDE-branded hand-held power equipment purchased by the practitioner from HDE or one of its official distributors*, from June 1st, 2016.

2. DEFINITION

a) Product Commercial Guarantee

HDE guarantees to the practitioner the breakage of his/her HDE-branded hand-held power equipment for a 12-month period following its date of purchase from HDE or one of its official distributors*. This guarantee applies to:

- Broken parts (except "wear" parts -paragraph 3.b)
- Labour costs
- Transport costs.

b) After-Sales Service Commercial Guarantee

All repairs made by HDE on HDE hand-held power equipment are guaranteed 6 months.

This guarantee covers:

- Broken parts replaced in the last 6 months (except "wear" parts -paragraph 3.b)
- Labour costs for the replacement of these parts
- Transport costs.

c) Free annual check-up

After the initial 12-month period of guarantee, HDE or Official Technical Centers* offer one Free Annual Check-up to extend the life of your equipment. It includes the following:

- Complete test of the equipment
- Disassembly
- Control of bearings, gears, seals, transmission cables, diamond disc, electrical connections, springs
- Cleaning
- Greasing
- Reassembly

Labour costs are free of charge, transport costs are at the practitioner's expense.

This free check-up is valid once a year (calendar year).

Further to this check-up, in case repairs are required, spare parts, repair labour and transportation costs are at the practitioner's expense. In which case, an estimate will be sent for approval before any repair is done.

3. IMPLEMENTATION

a) Product registration

The product commercial guarantee, the after-sales service commercial guarantee and the annual check-up will only be implemented if HDE products are registered on HDE's website within 15 days following the purchase by the practitioner from HDE or one of its official distributors*.

b) Disclaimer

The commercial guarantee applies to all HDE hand-held power equipment except:

A - Following wear parts:

- Diamond coating (Flexxidisc, Polyfloat burrs, axle burrs...)
- Gears (Flexxidisc and Polyfloat)

B - If the problem is caused by an accident

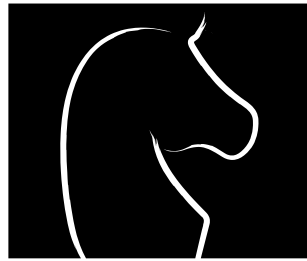

C - If the damage is caused by the user

D - If the user fails to comply with the instructions manual and/or HDE cleaning recommendations*

E - If the serial number of the product is removed or modified

F - If the product is not disassembled in an Official HDE Technical Center* or modified with non-HDE parts

G - If the product was not registered on HDE's website within 15 days after its purchase by the practitioner

PROFILING EQUIPMENT

EVOLUTION ENGINE (complete unit with jacket)

MEV_HDEBVEU

Wireless unit: work wherever and whenever you want

Autonomy: powerful & long-lasting battery for a daily practice (up to 10 horses)

Safety: the electronic clutch protects the equipment

Comfort and versatility: optimum weight distribution on shoulders and waist

EVOLUTION JACKET

ME_VME

- Only 400 g
- Very easy to put on and take off
- Cables and connections safely connected within
- Light, breathable fabric
- Machine washable at 30°C

CONTROL BOX

MEV_BCEP

Control box with integrated clutch

ENGINE

MEV_BMEV

- Low tension 24V mobile engine
- 6 speeds (2000 to 6000 rpm)
- Weight: 620 g

LITHIUM ION BATTERY

MEV_BLIIE

- Lithium Ion battery
- Autonomy: 10 horses
- Complete loading time: 2h30
- Weight: 815 g

BATTERY CHARGER

MEV_CBEE

Delivered with all major international plugs (European, UK, Australian and US)

PROFILING EQUIPMENT

N1 ENGINE

Powerful: for a regular equine dentistry practice

Simplicity: light and worn at the belt, it makes movements easy

Adjustable speed: the practitioner adapts the speed to the treatment

Versatile: works with any type of HDE burr

N1 ENGINE (complete unit)

MOT_1CREU

- Power supply 220V or 110V
- 4000 -9000 rpm
- Supplied with power cord + belt

European version (Swiss -UK versions available)

QUICKFLEX DRIVE SHAFT

- QUICKFLEX system for a quick fastening, for all HDE drive shafts
- Works with shear pins
- Stainless steel
- Available lengths: 1.20 m -1.60 m

1.20 m

With stainless steel shear pins	FLEX_R120SQAI
With brass shear pins	FLEX_R120SQAL

1.60 m

With stainless steel shear pins	FLEX_R160SQAI
With brass shear pins	FLEX_R160SQAL

DRIVE SHAFT SHEAR PINS

FLEX_INOX

STAINLESS STEEL SHEAR PINS

Bag of 20

Recommended with FLEXXIDISC & POLYFLOAT.

FLEX_LAIT

BRASS SHEAR PINS

Bag of 50

Recommended with all axle burrs.

The Flexxidisc is a versatile burr perfectly adapted for an efficient work on overgrowths as well as for routine profiling. It exists in different shapes and sizes adapted to every type of dentistry practice.

- A high quality diamond disc (± 900 horses).
- Diamond minimizes soft tissue damage.
- The small height of the head eases work on the 11th.
- The 360° rotating head allows optimal access (twist system on the curved version only).
- The curved version follows the natural shape of the jaw, allowing better access in the back of the mouth.
- Easy maintenance (no greasing necessary).
- The ergonomic rubber handle allows an optimal grip.

The Polyfloat is a very versatile tool which allows a global dentistry treatment, from routine profiling to decay and diastema treatment, thanks to a complete range of 14 different burrs (the Polyfloat is delivered without burr).

It exists in different shapes and sizes, adapted to every type of dentistry practice.

- The 360° rotating head allows optimal access (twist system on the curved version only).
- The curved version follows the natural shape of the jaw, allowing better access in the back of the mouth.
- A range of 14 different burrs for every type of treatment (profiling, decay, diastema, 06^s).
- Easy maintenance (no greasing necessary).
- The ergonomic rubber handle allows an optimal grip.

The 14 HDE Polyfloat burrs benefit from a high quality diamond coating (\pm 900 horses). Diamond minimizes soft tissue damage.

The HDE range features 3 types of burrs:

APPLECORE BURRS

Applecore burrs are ideally used for a work on overgrowths, especially on the 11th (\varnothing 14), 06^s profiling (with the short straight Polyfloat) as well as final profiling. HDE offers a range of 6 burrs of different diameters and shapes.

FRA_B14V2

 \varnothing 4 mm

FRA_CYLV2W

Length: 31 mm
 \varnothing 4.5 mm

Available in 3 different versions (straight, concave or convex), those burrs are specially designed to work on the 11°. The compact, long and narrow head with a limited height (1 cm) facilitates an optimum access in the back of the mouth.

- The diamond coating allows to reduce easily the back hooks.
- The concave and convex 11° burrs are adapted to the shape of the jaws for an easier access in the back of the mouth.
- Easy maintenance (no greasing necessary).
- Its rubber handle enables a perfect grip.

CONCAVE 11° BURR

FRA_F11C
Length: 54 cm
-Ø 9 mm

NEW

CONVEX 11° BURR

FRA_F11CX
Length: 54 cm
-Ø 9 mm

MAXILLARY BURR

FRA_F1

- Length: 29 cm
- Ø 15 mm / 5 mm
- Used with or without extension

- 106 to 108 & 206 to 208:
Its cylinder shape allows fast & efficient profiling.
 - 109 to 111 & 209 to 211:
Its conical shape eases access to narrow areas between cheek and tooth.
- Its conical protection applied to the cheek avoids contact with soft tissues and guides the burr on the tooth..

MANDIBULAR BURR

FRA_F2

- Length: 28 cm
- Ø 20 mm
- Used with or without extension

- 306 to 308 & 406 to 408:
Its tapered sides ease access and 06° profiling.
- 309 to 311 and 409 to 411:
Its protection has been designed to reach molars at the back of the mouth without damaging soft tissues.

ANGLE BURR

FRA_F3

- Length: 15 cm
- Ø 16 mm
- Used without extension

- This burr is very versatile. Thanks to the tapered part of its diamond head, it can be used:
- For the 06°
 - On incisors and hooks

BOWL BURR Ø 20

FRA_F4

- Length: 15 cm
- Ø 20 mm
- Used without extension

Its round shape offers impressive comfort and ease for the profiling of the 06°.

BOWL BURR Ø 18

FRA_F4D18SP

- Length: 15 cm
- Ø 18 mm
- Without burr protection
- Used without extension

DISC BURR

FRA_F5

- Length: 15 cm
- Ø 50 mm
- Burr thickness: 1 mm
- Protection thickness: 8 mm
- Used without extension

Used to reduce and realign incisor arcades.

6° BURR

FRA_F6C

- Length: 16 cm
- Ø 18 mm
- Used without extension

Its curve allows an easy 06° shaping.

Perfect for the profiling of important hooks, thanks to its large diamond coating diameter.

ERGONOMIC HANDLE FOR 6° OR ANGLE BURR

FRA_PAFBS

- Improves grip
- Very easy to install
- Fixing screw provided

This handle has been specially developed for practitioners looking for a better grip on their 06° (FRA_F6C) or angle burr (FRA_F3).

VESTIBULAR BURR

FRA_F6

- Length: 29 cm
- Ø 15 mm

Used with a slight opened mouth–opener it allows better comfort for the horse and the practitioner. Its less guarded protection allows a perfect working position.

NEW

PONY BURR

FRA_FP

- Length: 43 cm
- Ø 9 mm

Specifically designed to treat ponies it has proven to be very useful on new world camelids as well. Its compact size and tiny head offer optimal access in small mouths.

CANINE BURR

FRA_FSC

- Length: 14.5 cm
- Weight: 152 g
- Coil: Ø 6 mm
- Used without extension

Simple and easy profiling thanks to its miniature coil burr which is perfectly adapted for canines.

TOOTH SOCKET BURR

FRA_F9

- Length: 10 cm
- Used without extension

BOWL BURR Ø 8

FRA_F4D8

- Length: 16 cm
- Ø 8 mm
- Used without extension

EXTENSIONS

Easy to set up, extensions make it possible to work without putting the hand in the horse's mouth while following the movement of the horse.

Recommended with the maxillary, mandibular, vestibular and medium Flexxidisc and Polyfloat burs. 3 different versions are available.

SHORT EXTENSION

FRA_EXTC

- Length: 16 cm
- Stainless steel

MEDIUM EXTENSION

FRA_EXTM

- Length: 22 cm
- Stainless steel

LONG EXTENSION

FRA_EXTL

- Length: 28 cm
- Stainless steel

STAINLESS BRUSH

- Fast and efficient cleaning of all diamond burs
- Optional stainless steel holder

STAINLESS STEEL BRUSH

ACC_BNUE

STAINLESS STEEL BRUSH WITH HOLDER

ACC_BAS

- Premolar pony float, 20° angle -38 cm
- 50 mm blade sold separately
- 20 cm neoprene handle
- Stainless steel

Especially designed for ponies with narrow mouths.

MANUAL RASPS

A range of quality rasps which minimize soft tissue damages and make interventions easy.

FLOAT HANDLE (without blade)

- 20 cm smooth rubber handle
- Easy to clean
- Titanium or tungsten carbide blades sold separately
- Stainless steel

GOUGES STRAIGHT

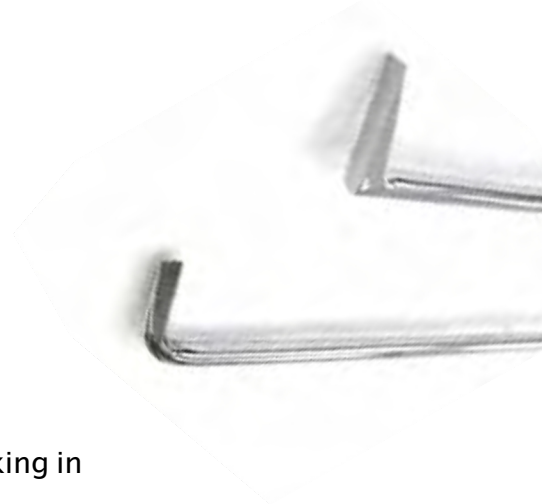

GOUGES CURVED

DENTAL PIC

- Length: 46.5 cm
- Height: 4 cm
- Width of the stainless steel handle: 8 cm

Its better grip gives more strength when rotating.
The handle acts like a visual and tactile cue while working in the horse's mouth.

Dental pic for rostral & caudal sides(T model) STO_PICTPI

Dental pic for vestibular & lingual sides(L model) STO_PICLPI

DENTAL SOND

- Length: 45 cm
- 2 models: left and right
- Ideal for preparing molar extractions
- Stainless steel

STO_SOND

STO_SONG

EXPLORER SOND

STO_SE

- Allows to probe and diagnose periodontal tissues
- Total length: 41 cm
- Stainless steel

DENTAL HOOKS

CLASSIC DENTAL HOOK

STO_CD

- Very resistant
- Easy to disinfect
- Length: 47 cm
- Height of the hook: 2 cm
- Stainless steel

DENTAL HOOK - SMALL MODEL

STO_CDF

- Total length: 41 cm
- Diameter of the hook: 2 cm
- Stainless steel

Allows to curette vestibular parts before extraction and to eliminate interdental residues.

CAPPS FORCEPS

DAV_DL

- Length: 40 cm
- Stainless steel

Its ergonomic handle and adjusted head ease the extraction of milk teeth.

MOLAR SPREADER

DAV_ESPI

- Length: 53.5 cm
- Stainless steel

This instrument loosens the molar to extract by leaning on the adjacent molars.

MOLAR FORCEPS WITH SCREW

DAV_MV

- Total length: 53.5 cm
- Possible height: from 1.5 to 3.5 cm
- Stainless steel

Thanks to its adjustable screw which acts like a lever, this forceps ensures better comfort during molar extraction.

MOLAR FORCEPS WITHOUT SCREW

DAV_M

- Total length: 53.5 cm
- Stainless steel

FULCRUM

- Length: 43 cm
- Stainless steel handle brass inserts
- 2 different models

Fulcrums are used as a lever for the molar forceps. During extraction, the different sizes and shapes will help remove the molar without difficulty.

4-ROOTMOLAR FORCEPS

DAV_F4ML

- Length: 53.5 cm
- Weight: 1.8 kg
- Stainless steel

Easily extract molars thanks to its specially-designed angles.

3-ROOTMOLAR FORCEPS

- Length: 53.5 cm
- Weight: 1.8 kg
- 2 different models (right and left)
- Stainless steel

RIGHT MODEL

DAV_F3B

LEFT MODEL

DAV F3BG

Its three-point grip is perfect for removing triangular fragments.

The side with the two points is positioned on the left or the right side of the tooth (depending on the forceps) and the other on the fractured side.

2-ROOTFRAGMENT FORCEPS

DAV_F2M

- Length: 53.5 cm
- Weight: 1.8 kg
- Stainless steel

A forceps with 2 long teeth for small molars fragments.

The diameter and length of its teeth capture and remove fragments within the tooth socket.

DENTAL MIRROR WITH POUCH

STO_MI

- Length: 47.5 cm
- Diameter: 50 mm
- Angle: 25°
- Anti-mist mirror
- Stainless steel

DENTAL MIRROR -SMALL MODEL

STO_MDD40

- Length: 41 cm
- Diameter: 44 mm
- Angle: 25°
- Anti-mist mirror
- Stainless steel

INSTRUMENT BOX

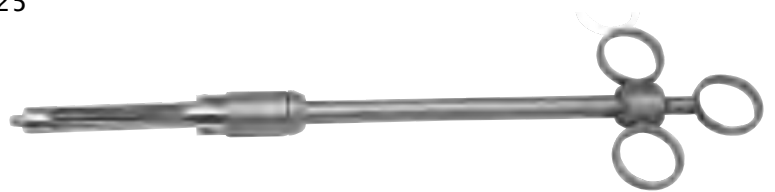

ACC_BI

- Dimensions in mm (L x W x H): 250 x 150 x 50
- Weight (empty): 0.7 kg

OB_PLAL

Like the arch spreader, these plates make work on the vestibular part easier.

INCISOR MALOCCLUSION PLATES

Standard
OB_PLABC

Large
OB_PLABL

Large surface tooth plates for an easy access on horses with incisor malocclusions.

INCISOR PLATES
OB_PLAI

Specially designed for safe work on the incisors.

ACCESSORIES

SURGICAL LAMP HEADLAMP WITH CARRYING CASE

ACC_LCV3

- Autonomy up to 4 hours
- Rechargeable battery (charging time around 4 hours)
- Working distance: 420 mm
- LED: 3 W / 60 000 lx
- Luminous intensity: 5500 Kelvin
- LED lifetime (50 000 hours)
- Lamp's weight: 280 g
- Delivered in a carrying case

This surgical headlamp is easy to use, lightweight and wireless. Adjustable height and focusable lamp which ensures optimal lighting in the horse's mouth.

MAGNETIC LAMP

OB_LOBV5

- Integrated magnetic holder
- Enhanced connections
- Battery autonomy: 12 hours
- Light charge: 130 lx
- Angle: 170°

RECHARGEABLE LED HEADLAMP

ACC_LFLV2

- 1 washable elastic headband
- 1 battery, 1 power adapter, 1 USB charger
- Integrated battery status by color system
- Autonomy up to 60 hours
- Charging time: 5 hours
- Luminous intensity up to 300 lx
- Total weight: 165 g

The new LED rechargeable headlamp is brighter, smarter, more durable and comfortable than the "standard" H7R version.

Can be used with 4 alkaline batteries AAA.

Equine dentalscopes are becoming increasingly useful in equine dentistry. They enable a more thorough examination of the oral cavity & dental arcades and allow a better detection of dental pathologies and utilise the camera and video capabilities of your laptop, phone or tablet.

BENEFITS

- Clear and precise diagnosis
- Better patient treatment and follow-up
- Better client dental education
- Added value and service

Starter Set-1

-Dentalscope for connection to a display device with cable

ACC_CD

Starter set + Wireless USB Connector-2

Dentalscope with USB wireless connector for phone / computer / tablet.

ACC_CDUSB

Starter Set + Wireless Monitor-3

Dentalscope with a 10" wireless monitor including recording system, micro-SD card and storage case.

ACC_CDM

FEATURES

- 3 monitoring options: TV screen (option 1), Wireless USB connector for phone / tablet / computer (option 2), Wireless screen (option 3)
- Available on PC Win 7, Win 10, Android phones and tablets
- 692 mm total length
- Head dimensions: width 17mm x thickness 17,2mm
- Rounded head on top
- Stainless steel
- Weight: 360 g

ACCESSORIES

RINSING PEAR

ACC_POIR

-Capacity: 250 ml

DENTAL PASTE

STO_PDD

- Dental paste for diastema filling
- Includes 2 components to mix

MAGNETIC HOOK

ACC_CA

- Stainless steel
- Max: 10 kg

ACCESSORIES

WATER HEATER

ACC_THER

Very useful in wintertime to keep hands warm and fingertips sensitive.

TUNIC

- Size 1 to 6: ACC_TT1 to ACC_TT6
- Customized embroidery upon request

OSCILLATING HEAD STAND

ACC_STO

- Weight: 5.45 Kg
- Height min-max: 111-180cm
- Width of the headrest: 50 cm
- Aluminum
- Washable and removable cover

Thanks to its oscillating system, the column follows the horse's moves, avoiding any risk of injury.

CLEANING RECOMMENDATIONS

You have purchased quality professional equipment.
Please find hereafter some advice on how to optimize its use and longevity.

GENERAL RECOMMENDATIONS

- Make sure each aspect of your equipment is always clean & dry before storage.
- HDE recommends at least 1 annual overhaul (or every 500 horses) of your complete equipment in an approved technical center*.
- HDE does not cover damages caused by the use of bleach.
- Find all of our recommendations in our products' instruction manuals.

DIAMOND BURRS

- 1 -Start the engine with the handpiece attached.
- 2 -Run it at high speed with the head pointing down to remove any remaining water.
- 3 -Clean the diamond burr by running it over the HDE stainless steel brush.
- 4 -Continue until the remains of dentine have completely disappeared.
- 5 -Clean with a cloth moistened with clean water and a disinfectant.
- 6 -Thoroughly dry with a clean, soft cloth.
- 7 -Store the burr in its dedicated place within your clean, dry case.

The burr is resistant to water projection, do not fully immerse in water.
Always use clean water without corrosive nor abrasive products.
Only use the HDE stainless steel brush.

DRIVE SHAFT

- 1 -Clean the outside sheath with a damp sponge.
- 2 -Dry thoroughly with a clean, soft cloth.
- 3 -When finished working, detach the drive shaft from the engine and the handpiece.
- 4 -Store the drive shaft in your clean, dry case.

Ensure not to bend the drive shaft in an excessive radius of curvature.

ENGINE

- 1 -Turn off the engine before cleaning.
- 2 -Clean the engine with a damp sponge.
- 3 -Thoroughly dry the engine with a clean, soft cloth.
- 4 -Store the engine in your clean, dry case.

HDE recommends to use the engine at medium speed (speed 3).

CASE

- 1 -Clean the case with a damp sponge.
- 2 -Thoroughly dry the case with a clean, soft cloth.
- 3 -Store in a clean and well ventilated place.

Make sure the case is opened from time to time,
to ensure your equipment is well ventilated.

MAI Animal Health

NZ Equine Dental Catalogue

Treating Animals. Differently .

AlumiSpec™  **PATENTED**

- Constructed of lightweight aluminum, net weight of 6 lbs
- Durability is not compromised by lightweight design - able to withstand bending forces in dental procedures
- Use of replaceable synthetic straps in the "cinch-lock" locking system allows for infinite degrees of access to the patient's oral cavity
- Easy to clean and is pliable at all temperatures
- May be used on all sizes of horses from miniature to draft
- Recommended for use with sedated animals for the safety of the handler and horse

Item	Product Description	UOM

X Spec™ Equine Speculum, Wide  **PATENTED**

- Next generation equine speculum, an enhancement of the original AlumiSpec™, known and trusted throughout the industry
- Wider design provides more space between the horse's cheek and speculum to accommodate digital radiography plates for obtaining dental films in a variety of positions
- Constructed of aircraft grade aluminum, CNC milled precision pieces, TIG welded with a durable powdercoat finish
- Use of replaceable synthetic straps in the "cinch-lock" locking system allows for infinite degrees of access to the patient's oral cavity
- May be used on all sizes of horses from miniature to draft
- Recommended for use with sedated animals for the safety of the handler and the horse
- Tested on hundreds of patients in an equine dental practice
- Net weight 6 lbs

Flexi-Float™ Ultra Complete Kit  **PATENTED**

The Flexi-Float™ Ultra is a lightweight, compact, all-in-one, battery-powered float system. The slender design and movable disc angle allows practitioners to maneuver around the dental arcade, along with its shaft which rotates 180 degrees for use on both the upper and lower arcade. This well balanced system has fully integrated irrigation, suction and trigger speed control which allows for quick removal of hooks in the mouth. The Flexi-Float™ Ultra is battery powered making it completely mobile. The rechargeable battery lasts between 8-10 horses. The diamond discs are smoother and last longer than carbide discs and can be quickly changed out in the field, taking less than one minute. Clean daily and grease after every 100 uses. Aluminum carrying tote sold separately.

Kit includes:

- Flexi-Float™ Ultra
- Battery-Powered Vacuum
- Li-Ion Batteries for Vacuum (2)
- Battery Charger for Vacuum
- Irrigation System
- Maintenance Kit (Grease Gun, Brush)
- 14.4-Volt NiMH Rechargeable Batteries (2)
- Battery Charger
- Protective Carrying Case
- Instruction Manual

De-MaX™ III Reciprocating Float

The De-MaX™ III Reciprocating Float is a reliable reciprocating system utilizing DeWalt® technology.

- Three different handle angles for ease in use
- Reciprocating gear has been modified from a 9/16" stroke to a 3/8" stroke
- Low profile allows the user complete maneuverability around the dental arcade
- Excellent for removing caudal hooks and for finishing upper and lower molars
- 12-Volt Li-ion battery
- Kit includes:
 - ◆ 19" Float Shafts (2); 1 Straight and 1 Angled
 - ◆ Batteries (2)
 - ◆ Charger
 - ◆ Fine Radius End Low Profile Blades (2)

Item	Product Description	UOM
53002	De-MaX™ III Reciprocating Float	Each

Power Handle™ Rotary Floats & Accessories **PATENTED**

The Power Handle™ instrument is an economical bur power system available in three sizes for accessibility to the incisors, premolars and molars.

- Cylindrical bur models include a removable 2" soft tissue guard which protects the horse's cheek
- Constructed of heavy duty stainless steel
- 5/8" x 2" carbide bur, solid cut
- Powered by a key drive
- Motors sold separately

Item	Product Description	UOM
53089	Power Handle™ Rotary Float, 17-1/2" Length, 90 Degree, 1" Diamond Disc	Each
53090	Power Handle™ Rotary Float, 7-1/2" Length, Cylindrical Bur	Each
53091	Power Handle™ Rotary Float, 10" Length, Cylindrical Bur	Each
53092	Power Handle™ Rotary Float, 17-1/2" Length, Cylindrical Bur	Each
53093	Cylindrical Bur, 5/8" Diameter, 2" Length, Carbide	Each
53094	Cylindrical Bur, 5/8" Diameter, 2" Length, Diamond	Each

Tri-Tip Grinder Kits

The Tri-Tip Grinder Kit is a unique grinder kit used to smooth out the molars, incisors and canine teeth in all areas of the dental arcade from miniature to draft horses. The knurled ultra slim profile guard measures 18" long. The kit includes your choice of interchangeable protective shrouds measuring 3/8", 1/2" or 5/8" diameter and a removable knurled handle measuring 6-1/4" long. Also offered is a choice of a 6" long cylindrical diamond chip bur 3/8", 1/2" or 5/8" in diameter and a 1" handpiece. The grinder is powered by a key drive external motor and may be used with any power unit: Dremel® or Foredom™. Additional shrouds and burs are available separately. Motors also sold separately.

Item	Product Description	UOM
53080	Tri-Tip Grinder Kit, 1/2" Shroud, 18" Length	Each

QuickFloat™ Kit

The Quick Float™ Kit is the ultimate cordless power set up. Lightweight, at about 2 lbs, the Quick Float™ is easy to use anywhere. Ideal for locations with no available power source. Includes 2 Li-Ion batteries, each battery lasting up to five horses.

Kit includes:

- Quick Float™ Motor
- Quick Float™ Wand with choice of Diamond Bur
- 2 Rechargeable Li-Ion Batteries
- Wall Charger Unit
- Lubricant
- Lube Gun
- Disk Pliers
- T-Wrench
- Convenient Carrying Case

Item	Product Description	UOM
58100	Quick Float™ Kit	Each

EQ Power Float™

The EQ Power Float™ measures 19 inches in length and features a low profile 90 degree head. The EQ Power Float™ is significantly lighter than most on the market today, weighing under 1.5 lbs. The EQ Power Floats are built in-house with high quality aluminum and stainless steel. Available with choice of bur and choice of Key Drive or Square Drive.

Item	Product Description	UOM
58102	EQ Power Float™ -Key Drive	Each
58103	EQ Power Float™ -Square Drive	Each

EQ Mini Power Float™

The EQ Mini Power Float™ measures 8.5 inches in length and features a low profile 90 degree head. Small and easy to maneuver, the EQ Mini Power Float™ is ideal for work on incisors and canines. The EQ Power Floats are built in-house with high quality aluminum and stainless steel. Available with choice of bur and choice of Key Drive or Square Drive.

Item	Product Description	UOM
58104	EQ Mini Power Float™ -Key Drive	Each
58106	EQ Mini Power Float™ -Square Drive	Each

MightyEZ Float™ Kits

The MightyEZ Float™ is a lightweight, battery-powered unit. Featuring an On/Off switch, variable speed control and a built in clutch, the MightyEZ Float™ offers all of the standard features in a convenient, cordless unit.

Kit includes:

- 2 Rechargeable Li-Ion Batteries
- Wall Charger Unit
- 43" or 66" Key Drive or Square Drive Complete Cable Assembly
- Convenient Carrying Case

Item	Product Description	UOM
58110	MightyEZ Float™ Kit -Key Drive, 43"	Each

German Adson 1x2 Tissue Forceps

Item	Product Description	UOM
54507	German Adson 1x2 Tissue Forceps, 4.75" Length	Each

**German Adson Brown Tissue Forceps, 4.75"**

Adson Brown Tissue Forceps are for holding and manipulating delicate tissues. These forceps have a wide, flat thumb grasp area that is commonly serrated. The jaws are short and the tips are narrow with 7x7 teeth.

Item	Product Description	UOM
75364G	German Adson Brown, 4.75" Length	Each

**German Allis Tissue Forceps, 6"**

German Allis Tissue Forceps are surgical instrument with sharp teeth, used to hold or grasp heavy tissue. German Allis Tissue Forceps can cause damage, so they are often used on tissue about to be removed.

Item	Product Description	UOM
75710G	German Allis Tissue Forceps, 6" Length	Each

**German Mosquito Hemostats Straight, 5"**

German Mosquito Hemostats can be used in various veterinary surgical and ophthalmologic procedures. They are best known for their fine tips, short and fully serrated jaws. They are available with straight or curved tips.

Item	Product Description	UOM
75302SG	German Mosquito Hemostats Straight, 5" Length	Each

**German Mosquito Hemostats Curved, 5"**

German Mosquito Hemostats can be used in various veterinary surgical and ophthalmologic procedures. They are best known for their fine tips, short and fully serrated jaws. They are available with straight or curved tips.

Item	Product Description	UOM
75302CG	German Mosquito Hemostats Curved, 5" Length	Each

**German Kelly Hemostats Straight, 5.5"**

German Kelly Hemostats are primarily used for clamping large blood vessels or manipulating heavy tissue by the veterinarian. They may also be used for soft tissue dissection. They are available curved or straight with a ratcheted finger ring handle. The tips of German Kelly Hemostats are serrated halfway up the jaws.

Item	Product Description	UOM
75306SG	German Kelly Hemostats Straight, 5.5" Length	Each

German Kelly Hemostats Curved 5.5"

German Kelly Hemostats are primarily used for clamping large blood vessels or manipulating heavy tissue by the veterinarian. They may also be used for soft tissue dissection. They are available curved or straight with a ratcheted finger ring handle. The tips of German Kelly Hemostats are serrated halfway up the jaws.

Item	Product Description	UOM
75306CG	German Kelly Hemostats Curved, 5.5" Length	Each

German Carmalt Hemostats Curved 6.25"

Nicknamed the "stars and stripes hemostat," German Carmalt Hemostats are characterized by the longitudinal serrations that run the length of the blade with cross-hatching at the tip. These large, crushing hemostatic forceps are a choice instrument for clamping blood vessels and large tissues or ligating pedicles. The textured blades, along with the scissor-like ratchet handles, ensure a strong grip of the clamped tissue with minimal chance of cutting the tissue during a procedure.

Item	Product Description	UOM
75316CG	German Carmalt Hemostats Curved, 6.25" Length	Each

German Backhaus Towel Clamps 3.5"

German Backhaus Towel Clamp is a perforating clamp used for securing a towel or drape to the patient's skin by means of a small puncture. This product is curved with 1 x 1 perforating prongs.

Item	Product Description	UOM
75704G	German Backhaus Towel Clamps, 3.5" Length	Each

German Scalpel Handle #3

German Scalpel Handle #3 is compatible with size (10, 11, 12, 15) series disposable blades and used for sharp dissection. This handle has horizontal serrations for thumb and forefinger gripping as well as a ruler on the back side.

Item	Product Description	UOM
75728G	German Scalpel Handle #3	Each

Equine Eye Pack

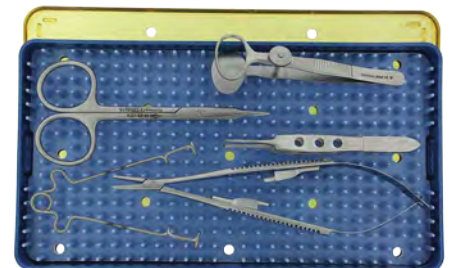

- Plastic Sterilization Tray
- Castroviejo Eye Speculum
- Bishop Harmon 1x2
- Chalazion Forceps 23 mm
- German Derf Needle Holder Tungsten Carbide
- Stevens Tenotomy Scissors Curved

Item	Product Description	UOM
75220	USI Equine Eye Pack	Each

**Eye Pack**

- Plastic Sterilization Tray
- Castroviejo Needle Holders
- Bishop Harmon 1x2
- Chalazion Forceps 20 mm

Battery-Powered Cautery Kit MDS-VET™

The Battery-Powered Cautery Kit is convenient and portable for cauterizing bleeders, removing skin tags or accomplishing many other tasks normally requiring an electro-cautery setup. At 2,200 degrees Fahrenheit, the kit is also useful in trimming beaks and nails on smaller patients and exotic animals.

Kit includes:

- Fine Tip
- Fine Tip, 4"
- Fine Tip (Loop)
- 2 "AA" batteries
- Carrying /storage case

Item	Product Description	UOM
48420	Battery-Powered Cautery Kit	Each

48426	Fine Tip, 6"	Each

Vet Case, DM Medical

High density thermoformed black plastic construction.

- Dimensions: 18" long x 10" wide x 12" high
- Two side compartments
- Similar to the Pandora Vet Case

Item	Product Description	UOM
01120	Vet Case, DM Medical	Each

Wapid-CUT™

- Unique and specially designed cutting instrument used to cut and remove footwraps, ID bands and ear tags
- Designed to use on most standing cows, eliminating the need for bandage removal by restraint with a hoof trimming table or by lifting the bandaged leg with a rope
- Saves time and reduces the risk of injury to the bandaged patient
- Recessed cutting blade, enclosed within a guarded frame, allows user to slide the instrument under a bandaged hoof and safely cut the bandage
- Durable handle grip contoured for comfort and ease of use
- Handle features a guard extending the length of the instrument providing separation of the user from the cutting edge of the instrument
- Manufactured of durable plastic with the blade securely insert-molded into the handle
- Many additional uses including the removal of matted fur on dogs and cats, efficient use in large animal surgeries or any other applications requiring safe and effective cutting
- Patent pending globally
- Autoclavable
