EQUI-STILL

Equine Dental Instrumentation....

Making dentistry fun again!

2026/7 CATALOGUE

Welcome to Equi-Still Stocks & Dental Instrumentation!

At Equi-Still, we sell safety!

Portable Equine Stocks

Our portable and stationary stocks are designed for equine dentistry, reproduction, radiology and standing surgery. Built for safety and durability, they feature quick-release mechanisms, galvanised steel and aluminium construction, and removable, washable padding.

Equine Dental Instrumentation

We supply quality instruments and equipment from Equine Blades Direct, HDE, Pegasos, MAI and our own Equi-Still range, from essential hand instruments to advanced powered systems.

NZ Servicing & Support

UK-trained in Equine Blades Direct equipment, we provide local servicing, maintenance and repairs for their entire range.

We carry extensive NZ stock and arrange regular UK and European orders.

Let us help you work safely and with confidence!

EQUI-STILL DIAGNOSTIC KIT

A carefully selected set of seven instruments plus extras to enhance and improve your equine dental examination... all in a handy zippered folding case.

KIT CONTAINS

- Round Mirror on T-Handle
  - smaller mirror may be easier to handle in the mouth
- Mirror Spares
  - to replace mirror in case of breakage
- Alligator Forceps
  - 40 mm long, with 2-3 cm tips at 90°.
- Double Ended Scaler
  - perfect for scaling tartar from incisors and canines, plus evacuating rostral diastemata
- Periodontal Probe with Black Increment Markings
  - for determining and documenting depth of periodontal pockets
- Large Curette Scaler
  - sturdy instrument for scaling teeth, evacuating diastemata, and as a general pick
- Dental Pick
  - sturdy instrument for evacuating diastemata and as a general pick—no separate pieces to lose
- Explorer Fine Tipped
  - Fine tipped probe for investigating for pulp exposures and other pathologies—remember, this one is more fragile than the pick and the scaler, above
- Leather-Look Synthetic Zippered Case
  - professional looking, with easy clean exterior

EQUI-SUPPORT

Our own standard head support lets you raise or lower your patient's head with a simple one-handed cleat.

- The Equi-Support system includes 4 metres of soft, heavy nylon braided rope and a quick-release cleat for safety
- Easy, one-handed action lets you release the support as quickly or slowly as you wish
- Dental halter not included

2026/7 CATALOGUE

EQUI-STILL PORTABLE & STATIONARY STOCKS

TUI MODEL PORTABLE STOCKS

TUI-S MODEL STATIONARY STOCKS

OPTIONAL EXTRAS

MINI-BAR
EQUI-TABLE
EQUI-TIE
EQUI-COVER

New Zealand-designed and manufactured portable and stationary equine stocks.

PORTABLE STOCKS

➢designed for safely, robustness and ease of use by a U.C. Davis-trained equine veterinarian and ICU Technician
➢heavy, hot-dipped galvanized steel
➢best quality closed cell foam padding with heavy duty woven polyester coated on both sides with flexible PVC
➢absence of a fourth post
➢quick-release rear latch
➢winch, water tank, and pump, powered via a jump-start battery pack, allowing you to use it with multiple practice vehicles without specialty wiring
➢ ***Equi-Tables*** are available as an optional extra, which may be mounted on one of three corners
➢stocks tip up and down via winch, and may be raised and lowered even when not attached to vehicle
➢patients may be restrained in forward or rearward configuration to assist in dental, reproductive, radiological, or surgical procedures
➢best quality engineering: which means our stocks back and tow beautifully, barely tracking around bends
➢our make and models are registered with the USA NHTSA (National Highway Traffic Safety Authority)
➢stocks met voluntary NATM Compliance Certification in 2018, meaning they met or exceeded most USA states' requirements for registration

a lasting investment in your practice and your safety

MODEL TUI

- one side of stocks is formed from square steel bars, allowing better access to patient
- The other side is heavy plywood, which may be drilled to allow rope placement to fit your smaller patients
- a rope, or Optional Extra ***Equi-Tie***, holds patient in place, whether horse is placed head-first or rear-first for reproduction work

STATIONARY STOCKS

- designed for safely, robustness and ease of use by a U.C. Davis-trained equine veterinarian and ICU Technician
- heavy, hot dipped galvanized steel
- best quality closed cell foam padding with heavy duty woven polyester coated on both sides with flexible PVC
- absence of a fourth post
- quick-release rear latch, which combined with only three posts, means stocks open up fully in emergency
- stationary stocks come with separate mounting pipes to inset into floor concrete where you wish the stocks to be placed, so the stocks may later be moved
- An ***Equi-Table*** is available as an optional extra
- stationary stocks have no floor, winch, pump, water tank, etc.
- a lasting investment in your practice and your safety

TUI STATIONARY

- as with our portable stocks, one side of stocks is formed from square steel bars, allowing better access to patient
- a rope, or Optional Extra ***Equi-Tie*** holds the patient in place, whether horse is placed head-first or rear-first for reproduction work
- best quality closed cell foam padding with heavy duty woven polyester coated with flexible PVC on both sides
- absence of a fourth post
- quick-release rear latch
- a lasting investment in your practice and your safety

OPTIONAL EXTRAS

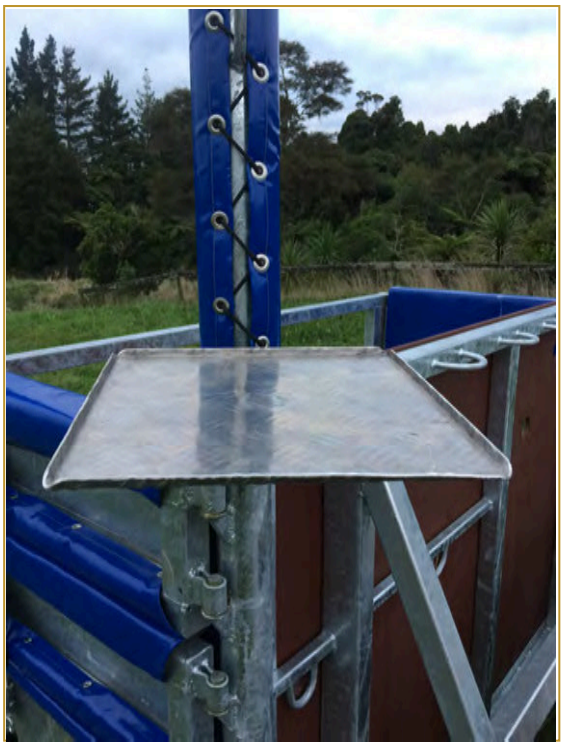

THE MINI BAR

- mounted on the lowest side rail of the stocks to help contain your smaller patients, be they equine, camelid, bovine or anything else
- easy on, easy off

THE EQUI-TIE

- heavy, thick, soft nylon rope with brass snap
- keeps patients in place during procedures
- plywood backing of ***Tui*** model may be drilled at heights appropriate to your patients' sizes to run the soft rope through

THE EQUI-COVER

- stocks cover for use while on the road or for storage
- same poly/PVC as stocks upholstery
